Now, more than ever...

In the face of unsteady housing markets and an unsettled economy, the North Carolina Housing Trust Fund has proven its power to build communities, the economy and lives.

...Housing Builds.
Your Investment in 2008 has paid off.

The General Assembly appropriated $15.5 million to the Trust Fund in Fiscal Year 2008. The entire appropriation had been committed to specific developments by year-end 2008. With this appropriation, the Trust Fund has delivered:

- $57.21 million in housing construction and rehab
- $4 of housing produced for every $1 of state investment
- 1,040 construction jobs
- $8.22 million in local and state tax revenues
- 1,260 homes and apartments

The Trust Fund is the state’s most flexible housing resource for:

- serving homeless families and individuals, victims of domestic violence, and persons with disabilities
- ensuring seniors and persons with disabilities can continue living in their own homes
- producing energy-efficient and “green” standard housing
- providing successful entry-level home ownership

To reach its potential, the Trust Fund needs an adequate and reliable source of funds. It needs a substantial recurring appropriation in the 2009 Session, especially when funds are short and North Carolina’s housing and economic challenges are great. Our goal is to achieve a minimum of $50 million in annual funding.

Now, more than ever, North Carolina needs decent, safe and affordable housing that the Trust Fund can build, given the necessary resources.

The $132.6 million cumulatively invested in the Trust Fund has created:

- $669 million of housing construction and rehab
- 19,947 homes and apartments
- 11,000 construction jobs
- $96.6 million in local and state
